Firma Profili

Company Profil

Established in 2013, Deltasan Transformer has quickly specialized in the production of power transformers and distribution transformers. Deltasan Transformer continues its journey by offering a wide range of products to meet various power needs and provide quality solutions to its customers.

Deltasan Transformer manufactures distribution transformers ranging from 25 kVA to 2.500 kVA and power transformers from 3.15 MVA to 40 MVA.

Located on a total area of 25,000 m², with modern facilities covering 15,000 m² indoors and 10,000 m² outdoors, DeltasanTransformer ensures the production of transformers that meet industry standards through a production process combining high-quality materials and expertise, resulting in reliable and durable transformers.

Prioritizing quality and reliability, Deltasan Transformer adopts customer satisfaction as a fundamental principle, aiming to provide top-notch service with the most trustworthy and innovative solutions in the industry.
